Time Management Tips and Tricks

Business Academy Group Learning · Time Management · July 2027

You can’t make more hours, but you can make the ones you have work harder. Start by seeing where your time really goes.

See where your time goes

- **Track for one week.** Write down business tasks in 30-minute blocks.
- **Look for patterns.** Which tasks take longer than they should? Which happen every day?
- **Count interruptions.** Phone calls and messages can break up your whole day.

Protect time for the business

- **Block a business hour.** Same time every week, on your calendar.
- **Use nap or quiet time well.** Save focused tasks like the budget for calm times.
- **Set message hours.** Let families know when you respond to non-urgent messages.

Work smarter

- **Batch tasks.** Do all billing, shopping, or messages at one set time.
- **Use templates.** Save reminder messages, tour notes, and forms to reuse.
- **Automate.** Autopay, recurring supply orders, and calendar reminders.
- **Keep a running list.** One list for all tasks, so nothing lives only in your head.

Share the load

- **Delegate.** Staff can handle supply checks, room setup, or parent sign-in.
- **Ask for help.** Family members or a bookkeeper may take on some tasks.
- **Use shared services.** The VSSN platform may offer tools that save admin time.

Protect your rest

- **Set an end time.** Decide when the workday stops.
- **Plan time off.** Put closure days or vacation on the calendar early.
- **Watch for burnout.** If you’re running on empty, talk with your Business Specialist about what can change.
